The sample below **DOES NOT** include all of the content. The complete version is included in every Proposal Pack product and must be purchased to see the rest of the material.

Read this article to help you create a winning proposal using your Proposal Pack and this sample: [HOW TO WRITE A HOME CARE SERVICES PROPOSAL](#)

Your proposal and quote could be just a couple pages long or over a hundred pages long depending on your needs, **all created with one affordable Proposal Pack**.

*** PDF samples are not editable. You MUST buy a \$67 Proposal Pack for the editable templates.

Blair Bennion
Briarwood Senior Condo Association
455 NE 19th
Moses Lake, WA 98837

Dear Mrs. Bennion,

Thank you for your preliminary phone call about our landscaping and lawn services. We appreciate your interest in our company. Attached is a sheet covering the services we offer, a history of our company, and a price list. You'll find that our prices are extremely competitive, and you can be assured that not only do we have fair pricing, but that you will receive the best service. VitaGreen has been voted best landscaping service by the Moses Lake Business Journal 6 years running.

Our suggestion for your association, given the size of your property, is to establish a weekly program of lawn and shrub/tree care. This would include mowing, fertilizing, pruning, and removal of yard waste. Keeping your landscaping healthy is our first priority, and will lessen the number of times we will need to spray for pests. We suggest at the very minimum a once yearly application of pesticide for your established trees for common pests like aphids, which can get severe in our area. In addition, your pines should be prepared to fend off attacks from Pine Beetle. Once the beetle attacks, there is little remedy but to cut down the infected trees. We have found that spraying once in the late spring and once in the late summer is the best preventive measure. We would further suggest a bi-weekly program of organic powdery-mildew spray during the months of August through September, when it is most severe in our area. This is a surprisingly effective and inexpensive spray, and will allow your residents to enjoy their gardens without fear of contamination from harsh chemicals.

We can keep your landscaping looking healthy and lush. We would be happy to provide free estimates for any services you should choose, and we can further offer you, as a special incentive, to provide disease, pH and soil analysis for your property.

We look forward to hearing from you, and would be glad to speak with you further about your needs.

Sincerely,

George Espinoza, Owner, VitaGreen

Briarwood Landscaping and Lawn Services

Prepared for: Blair Bennion
Landscaping Chair

Prepared by: George Espinoza
Owner

Establishing a weekly program of lawn and shrub/tree care for Briarwood Senior Condominium Association. Keeping your landscaping healthy is our first priority, and will lessen the number of times we will need to spray for pests.

Included is our list of services, prices and our company history.

Proposal Number: 448-982

Services Provided

VitaGreen provides the following services. Services listed here are guaranteed to keep your yard green and healthy.*

◆ **New Lawns**

New lawns from your choice of seed: Kentucky Bluegrass, Dwarf Fescue Mix (xeric), Zoysia, or Buffalo Grass. We are happy to help determine which lawn will be right for your situation (foot traffic, use, shade, soil type, water, etc...) Sod is available in Bluegrass and Fescue only.

◆ **Lawn Maintenance**

Once your lawn is established, VitaGreen will mow, fertilize (organic or traditional methods), aerate, and dethatch your lawn for you to keep it healthy and green.

◆ **Sprinkler Systems**

If you want to save money on water and have less yard maintenance, we suggest a sprinkler system. We have designed systems from between 4 and 20 stations, for yards as small as .05 acres to properties as large as 5 acres. We can zone your sprinkler system for varied flow based on purpose such as lawn versus vegetable garden. Whatever your watering needs, we can design and install a system that will work for you.

◆ **Yard Maintenance**

Our most popular yard maintenance service is the Spring and Fall Cleanup. We come in twice a year, shape up the yard, and haul off all pruned vegetation, weeds, and yard waste. We also offer fertilizing and pruning of shrubs and trees.

◆ **Pest Control**

In the last ten years, Fire Ants and Pine Beetles in our area have become debilitating. We suggest preventive measures if you own Pine trees, and aggressive control if you spot either of these pests in your landscaping. Our general pest spray service will control most other types of pests, including aphids, wasps, grubs and beetles.

◆ **Soil and Disease Analysis**

We believe that your landscaping can only be as good as the soil it is grown in. We offer pH analysis, mineral analysis, and soil type analysis. This is especially helpful for those beginning to landscape their yard. We offer amendments to improve your soil. We also offer analysis of diseased trees, shrubs, and lawns, and provide proper treatment.

*some restrictions apply
